

Making Biofreeze available to your patients to manage their conditions during, and post therapy is sound, responsible healthcare.

Don't let your patients waste time trying topicals that don't work or cost a fortune. Give them a sample of BIOFREEZE® and instruct them on how and when to use it.

Keeping your patients pain-free and pro-active about therapy is always the best medicine.

Dear Sirs,

I am disabled due to lower back problems which require extensive therapy including hot and cold therapies. I have used your product "Biofreeze" for a lower back injury. It has worked well in relief from minor aches and pains. I have exhausted my supply of the gel and I have not been able to find more of your product in the drug stores anywhere. Have you discontinued marketing your product? I hope not. Can you advise me where I might obtain a supply for personal use? I have used other brands but they do not work as well as your product does. Do you have any other products similar to "Biofreeze" that might work as well?

I request any information you might be able to assist me with, as I have moved out of Pennsylvania where I had previously purchased your product.

Sincerely,

Anthony Gallman
