Performance Health

To Whom It May Concern:

I wanted to take a few minutes out of my day to thank your company. Your products have become a staple of my treatment protocols. It seems like every time I turn around another great product is out and is helping my patients.

Biofreeze is a magnetic draw for my practice. Whether they have been using it for years or just heard about it from a friend, people walk in and ask for it by name. People know that nothing else works as well as "the minty green gel". The disappearing odor is a tremendous selling point. I find myself using it on a daily basis. Not only do my patients feel better, but they can return to work without needing to change clothes.

I discovered Prossage about a year and a half ago. It has made a huge impact on my practice. My practice centers on the treatment of myofascial conditions. Nothing warms deep tissue as effectively as Prossage Heat. Whether I am using Neuro-Muscular Re-Education techniques, or my Massage Therapists are doing their best for a patient, our choice is Heat. While remodeling my home, my traps took a beating. I could not take time off, and Heat allowed me to get up and get moving each day. The Prossage helped melt my traps and free them from imprisonment in my ears!

Your newest wonder is Biofreeze spray. I don't know how, but you've caught lightning in a bottle once again. I can apply it and not worry about rubbing my eyes or nose. Arthritic and infirmed patients can apply it to areas they cannot always reach. Quite simply, it is liquid magic.

Your wonderful products have helped me teach my patients about the difference between acute and chronic care. You've created simple therapies for nearly all conditions. These products are valuable tools I wouldn't be without. Please excuse the hyperbole, but I really don't have enough good things to say about these products. They meet the most important criteria for any doctor: **THEY WORK!** These products are affordable, they sell themselves, and they draw people to your office.

I dare anyone who has not tried them already to give the whole line a shot. You will not be sorry.

Todd M. Mueller, D.C.
